

ID	ADMIN1
Purpose	Test successful adding of workers
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Add new worker
Expected Result	New worker is added to workers
ID	ADMIN2
Purpose	Test successful editing of workers
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Edit worker information
Expected Result	Worker is updated with new information
ID	ADMIN3
Purpose	Test successful adding of working times/dates
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to working times/dates
	3. Add new working time
Expected Result	New working time/date is added
ID	ADMIN4
Purpose	Test successful editing of working times/dates
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to working times/dates
	3. Edit existing working time/date
Expected Result	Working time/date is updated
ID	ADMIN5
Purpose	Test successful viewing of past bookings
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to bookings
	3. Navigate to past bookings
Expected Result	Past bookings are viewable
ID	ADMIN6
Purpose	Test successful sorting of past bookings
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to bookings
	3. Navigate to past bookings
Expected Result	Past bookings are sorted by date
ID	ADMIN7
Purpose	Test successful viewing of worker availability
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers

	3. Navigate to availability
Expected Result	Worker availability for the next seven days are shown
ID	ADMIN8
Purpose	Test unsuccessful adding of workers due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Add new worker
Expected Result	New worker not added, and error message shown
ID	ADMIN9
Purpose	Test unsuccessful editing of workers due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Add new worker
Expected Result	Worker information not updated; error message shown
ID	ADMIN10
Purpose	Test unsuccessful editing of working times/dates due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to working times/dates
	3. Edit existing working time/date
Expected Result	Working time/date not added, and error message shown
ID	ADMIN11
Purpose	Test unsuccessful viewing of past bookings due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to bookings
	3. Navigate to past bookings
Expected Result	Past bookings not shown; error message shown instead
ID	ADMIN12
Purpose	Test unsuccessful sorting of past bookings due to mistake in programming
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to bookings
	3. Navigate to past bookings
Expected Result	Past bookings shown but not sorted

ID	ADMIN13
Purpose	Test unsuccessful viewing of worker availability due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Navigate to availability
Expected Result	Worker availability not shown; error message shown instead
ID	ADMIN14
Purpose	Test successful deletion of workers
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Delete worker information
Expected Result	Worker is removed from database and site
ID	ADMIN15
Purpose	Test unsuccessful deletion of workers due to database crash
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Delete worker information
Expected Result	Worker is not removed; error message shown instead
ID	ADMIN16
Purpose	Test unsuccessful adding of workers due to worker already added
Set Up	Admin logs in
Steps	1. Navigate to dashboard
	2. Navigate to workers
	3. Add already existing worker (same id)
Expected Result	Worker not added and an error message is shown

ID	WORKER1
Purpose	Test successful adding of worker availability
Set Up	Worker logs in
Steps	1. Navigate to dashboard
	2. Navigate to profile
	3. Input availability for the next seven days
Expected Result	Worker availability for the next seven days added
ID	WORKER2
Purpose	Test successful editing of worker availability

Set Up	Worker logs in
Steps	1. Navigate to dashboard
	2. Navigate to profile
	3. Edit availability for the next seven days
Expected Result	Worker availability for the next seven days updated
ID	WORKER3
Purpose	Test unsuccessful adding of worker availability due to database crash
Set Up	Worker logs in
Steps	1. Navigate to dashboard
	2. Navigate to profile
	3. Input availability for the next seven days
Expected Result	Worker availability for the next seven days not added: error message shown
ID	WORKER4
Purpose	Test unsuccessful editing of worker availability due to database crash
Set Up	Worker logs in
Steps	1. Navigate to dashboard
	2. Navigate to profile
	3. Edit availability for the next seven days
Expected Result	Worker availability for the next seven days not updated: error message shown

ID	CUSTOMER1
Purpose	Test successful viewing of available days/times
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Navigate to available days/times
Expected Result	Available days/times are shown
ID	CUSTOMER2
Purpose	Test successful viewing of services
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Navigate to services
Expected Result	Available services are shown
ID	CUSTOMER3
Purpose	Test successful viewing workers providing the service
Set Up	Customer goes on website
Steps	1. Navigate to main page

	2. Navigate to bookings
	3. Navigate to services
Expected Result	Workers providing the service are shown
ID	CUSTOMER4
Purpose	Test successful specific booking
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Book specific worker, day, and service
Expected Result	Successfully booked with specific choices
ID	CUSTOMER5
Purpose	Test unsuccessful viewing of available days/times due to database crash
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Navigate to available days/times
Expected Result	Available days/times are not shown, and error message is shown
ID	CUSTOMER6
Purpose	Test unsuccessful viewing of services due to database crash
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Navigate to services
Expected Result	Services not shown; error message shown instead
ID	CUSTOMER7
Purpose	Test unsuccessful viewing workers providing the service due to database crash
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Navigate to services
Expected Result	Workers providing the service are not shown; error message shown instead
ID	CUSTOMER8
Purpose	Test unsuccessful specific booking due to invalid input by customer
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Book specific worker, day, and service but one input is invalid (ie. Unavailable day)

Expected Result	Booking shown as unsuccessful when submitted
ID	CUSTOMER9
Purpose	Test unsuccessful specific booking due to database crash
Set Up	Customer goes on website
Steps	1. Navigate to main page
	2. Navigate to bookings
	3. Book specific worker, day, and service
Expected Result	Booking shown as unsuccessful; error message shown
